

Parent/carer views about how well you have all done with online learning

Parent/carer views and opinions
I wish I could answer this. I don't know how else you can improve.
Very calm environment and easier to concentrate. Very well prepared and a lot of different activities throughout the day but still routines that help to keep focused
Fantastic as children are kept safe
He has been occupied with so many amazing school activities which has been great
I think it is very well prepared !
The content is great and the teacher show so much patience. Thank you all for being so dedicated to our children's learning.
All year 1 staff have been brilliant!
-Having regular contact and feedback from the teacher has been excellent (we take photos everyday of the work my daughter has done and the teacher emails back). My daughter really likes her teacher and enjoys receiving this positive and helpful feedback. -kept our daughter in touch with her class mates, not the same as face to face but much better than nothing
Teachers have been amazing. Engaging and absolutely committed to learning
I have really enjoyed knowing more about the topics being taught and what my child is learning
It's been nice for me to see how the lessons are done and do the learning with my child.
it has been very reassuring and positive to see how well the teachers have handled it; with such patience, consistency, understanding, professionalism and clear communication with the kids and us. Sadly, as a result of the whole pandemic experience I do think children everywhere have been the worst affected on an emotional and social level. Luckily for mine I am confident I can help her with this but it definitely has been sad to see...fortunately, because of Bevington though, I believe she has not suffered too much in terms of her education. So thank you.
My daughter has loved seeing her friends and her teacher and it maintains a little bit of 'normality' and routine.
This time around is much better than the first time, as having the teachers there helps the child to stay on track with their learning and by been able to see the other children they didn't feel so isolated and are able to still enjoy the school time.
Keeping the children in a routine. My daughter already feels more grown up and responsible, having to get her laptop, pencil case and books ready every morning. Excellent adaption during the pandemic. Thank you
The kids are very engaged for the whole school day in the safest way possible being home and not using public transport. Also, the teachers are very enthusiastic and the kids are enjoying it.
Teacher's are organised, helpful
Firstly a call out to the amazing level of online learning Bevington have provided. We feel very lucky! Keeping the same school day structure has worked well, and will hopefully ease the transition back to school life. It's given parents a great insight into how the children are learning each topic so as to be able to support them with their learning outside the classroom. Introducing lots of movement sessions has also really helped with breaking up sessions and aiding concentration.
I really like the structure of how my child is getting her education and not missing out on her work that for me and her has been a positive thing for us.
The classes are well structured and the timetable runs to the same schedule as school, which brings comfort and familiarity to my child. The quality of teaching is excellent and it's great the online class runs for the whole school day compared with the first lockdown which was extremely challenging as a home working parent
I think it is very well prepared!
I wish I could answer this. I don't know how else you can improve. A mute all button? 😊 (I know that's not something you can control) thank you all!

It's a really difficult situation and I think the teachers have done an amazing job. They are so committed and are lovely with the kids. Our daughter continues to engage with her online learning and enjoy being part of the school community.

Nothing I can think of. The school is doing an amazing job. So grateful.

I think you are doing really good job with our children

The resource pack that we were able to pick up was a hit! With number lines, 100 squares, art materials and text books it really helped make some of the lessons feel like they would have done in the classroom. Keeping the online learning sessions as close to the in class experience is ideal, even down to the teachers enforcing behaviour as they managed to do so well.
